

WorkForce DS-860 and DS-860N

Desktop scanning Ultimate performance

Faster high-volume scanning

Designed for fast, high volume scanning environments, the DS-860 compact scanner features an 80-sheet high capacity Automatic Document Feeder and scans in colour at up to 65ppm/130ipm at 300 dpi. With a high daily duty cycle of 6,000 pages, the DS-860 provides reliable, productive scanning.

Advanced paper handling

The DS-860 also offers dynamic skew correction and separation rollers to reliably separate and feed each page into the scanner while correcting entry angles. Double-feed detection also ensures every page is scanned, so you can feed documents faster – without risking input error. From A6 to A4, you can place a range of document sizes in the feeding tray and the DS-860 will automatically detect and scan everything in the correct size, all in a single batch.

For A3 documents, the DS-860 includes a manual A3 switch, simply fold the A4 document and switch the scanner to non-separation mode. Choose to keep two separate A4 files or with the automatic stitching function in Epson Scan, both halves of the image will be reproduced and merged back to A3.

Improve originals with advanced image enhancement

Epson Scan software is packed with a wide selection of advanced document imaging features, including text enhancement, de-skew, hole punch removal and colour drop out. The software is designed to enhance image quality, whilst improving efficiency and increasing the workload output. The Epson Scan features are built into Epson's Document Capture Suite software.

Share documents with ease

Document Capture Pro 2.0 enables individuals to scan, save and share information around the business with an easy to use desktop software application. Advanced features for naming, separating and routing documents ensures scanning processes can be optimised and files can be sent in common formats including PDF, jpeg, tiff and other formats. Create simple job profiles for one touch push scanning.

Document Capture Pro Server 2.0 is powerful server based software for use with the WorkForce DS-860N. Document Capture Pro Server 2.0 allows administrators to centrally manage job profiles, manage devices and monitor fleet performance without the need to install software on individual computers whilst users see simple push scan functions that enable documents to be scanned intuitively and securely. For more advanced needs, add your own plugins with our self-developer kits.

Certified by Kofax and supporting both ISIS and TWAIN drivers, the WorkForce DS-860 is ideal for use with existing document management systems.

	DS-860	DS-860N
Colour scanning speed	65ppm / 130ipm at 300dpi	65ppm / 130ipm at 300dpi
